EDUCATION

University of Guelph	2027
Bachelor of Computing (B.Comp.), Computer Science	GPA: 4.0
Minor in Mathematics	
Skills: C, Python, Java, R	

TECHNICAL SKILLS

Programming Languages:
Java, Python, C/C++, HTML, CSS, JavaScript, TypeScript, R
Frameworks/Libraries:
React, Next.js, Tailwind CSS, Flask, Prisma ORM, NumPy, Pandas, Matplotlib
Tools/Technologies:
GitHub, Visual Studio Code, PyCharm, MySQL, SQLite, AWS, Google API (Gemini, OAuth), Docker

EXPERIENCE

Research Assistant	May 2025 - August 2025
<i>University of Guelph Research, Guelph, Ontario, Canada</i>	
- Collaborated with a research team to investigate the reliability of heart rate variability (HRV) as an indicator of stress. - Conducted data analysis and created visualizations to interpret physiological response patterns.	

Founder	May 2024 - August 2024
<i>Skin-Sync, Guelph / Brampton, Ontario, Canada</i>	
- Led the development of an AI-powered skincare app capable of diagnosing and providing advice for over 100 different skin types and concerns. - Integrating highly specialized AI technologies to deliver tailored skincare routines, improving user accessibility and engagement.	

Software Developer	Feb 2024 - April 2024
<i>Engineering Ambition, Guelph, Ontario, Canada</i>	
- Designed and developed full-stack applications for clients, including a platform enabling hundreds of students to prepare for exams like the MCAT and LSAT. - Built scalable software solutions using Next.js and React, ensuring responsive, user-friendly designs with Tailwind CSS.	

PROJECTS

Skin-Sync: AI-Driven Skincare Tracking and Advice App 🧖
Dermie: AI-Powered Chatbot - Developed Dermie, a friendly AI chatbot integrated with Google Gemini API, trained using the latest dermatologist research. - Designed to provide personalized skincare advice and guidance in an engaging manner. - Skills: AI, Google Gemini API, Flask, React.
Neural Network Image Recognition 🧠
- Developed a neural network from scratch for image recognition, incorporating custom weight initialization, ReLU and softmax activation functions, and Adam optimization. - Implemented forward and backward propagation, data pre-processing, and real-time prediction testing. - Skills: Python, NumPy, Pandas, Matplotlib, AI

Volunteer

Marketing Team Member	Sept 2021 - Sept 2022
<i>Canadian Blood Service, Brampton, Ontario, Canada</i>	
- Designed digital assets and marketing materials, showcasing creativity and proficiency in tools like Adobe Photo shop. - Increased the number of donors by 50, leveraging data-driven strategies to enhance community engagement—skills applicable to project management and user engagement.
