Education

University of Guelph

Bachelor of Computing (Computer Science), Minor in Mathematics

April 2027

GPA: 3.7

Relevant Coursework: Data Structures, Software Engineering, Parallel Programming, Database Systems, Data Science

Technical Skills

Languages: Python, Java, C#, C++, C, JavaScript, TypeScript, SQL, Bash

Frameworks & Technologies: .NET, React, Angular, Next.js, Node.js, Express, FastAPI, PostgreSQL, Supabase

Developer Tools: Git, Docker, DataGrip, Vercel, Codex, Claude Code, Google AI Studio

Software Engineering: REST APIs, System Design, Distributed Systems, Data Modeling, ETL Pipelines, API Design, Performance Optimization, CI/CD

Experience

Software Development Engineer Intern

May 2026 – Aug 2026

Criteo — Ad Validation & Activation, Retail Media R&D

- Improved a core budget service by removing unnecessary lookups, boosting edge-case performance by **~60%**.
- Led a cross-team approval-tracking project across **3 systems**, coordinating **10 sub-tasks** and **2 code reviews** with zero issues.
- Designed the activity-log architecture by extending an existing data structure, earning approval from **2 engineering teams**.
- Simplified an approval workflow by cutting rejection clicks by **~50%** and retiring **6 outdated feature flags**.

Teaching Assistant — University of Guelph

Sep 2025 – Dec 2026

Courses: CIS*1910 Discrete Structures (F25, F26), CIS*2170 User Interface Design (W26), ENGG*1410 Introductory Programming for Engineers (F26), STAT*2040 Statistics (F26)

- Led weekly Discrete Structures labs for **25+ students**, teaching logic, proofs, and algorithmic problem solving.
- Explained technical concepts through examples, guided problem solving, and individualized feedback.
- Supported students across **5 course offerings** through labs, tutorials, office hours, grading, and feedback.

Research Assistant — University of Guelph

May 2025 – Aug 2026

Human-Computer Interaction, AI & Wearable Technology Research

- Built an AI-assisted drawing application and designed experiments comparing AI-supported and static creative workflows.
- Analyzed user interaction logs, **18 interviews**, and **238 app reviews** to identify behavioral and usability patterns.
- Translated qualitative and behavioral findings into interface design recommendations for AI and wearable systems.

User Experience Researcher

Mar 2026 – May 2026

Permalution — Climate Technology Company (Contract, Part-time, Remote)

- Collaborated with a team to redesign Permalution's website using **Claude-assisted design workflows**.
- Evaluated usability, accessibility, and navigation across key website flows, translating findings into actionable UX improvements.
- Produced wireframes and interface recommendations that aligned product messaging, user needs, and climate-technology use cases.

Entrepreneurial Experience

Founder & Technical Lead

SkillNode — AI Career Development Platform

Live Site

- Architected and deployed an AI career platform with **Next.js**, **Firebase**, and **AI APIs**, generating tailored documents in **1–2 minutes**.
- Built evaluation workflows across **30 test cases**, **210 renders**, and **120 AI outputs** to validate layout and generation consistency.
- Optimized prompt pipelines, model selection, and API usage to reduce inference costs while maintaining **95%+ gross margins**.

Publications

Ludic Ambiguity on the Wrist: How an “Imperfect” Stress Avatar Becomes a Social Play Mechanic

ACM CHI PLAY 2026 — Sriharish Eswarathas (First Author), Zhao Zhao (Co-author) — doi.org/10.1145/3831349

Projects

RateMyFacilities — Data Visualization of Canadian Public Infrastructure

GitHub

Skin-Sync — AI Skincare Assistant
