EDUCATION

University of Guelph

2027

Bachelor of Computing (B.Comp.), Computer Science
Minor in Mathematics

GPA: 3.7

Courses: Theory of Computation, Software Engineering, Intro to Intelligent Systems, Complex Analysis

TECHNICAL SKILLS

Programming Languages:

Java, Python, C/C++, HTML, CSS, JavaScript, TypeScript, R, Swift, Flutter

Frameworks/Libraries:

React, Next.js, Tailwind CSS, Flask, Prisma ORM, NumPy, Pandas, Matplotlib

Tools/Technologies:

GitHub, Visual Studio Code, PyCharm, MySQL, SQLite, AWS, Google API (Gemini, OAuth), Docker

EXPERIENCE

Teaching Assistant — CIS*1910 Discrete Structures in Computing I

Sep 2025 – Dec 2025

School of Computer Science, University of Guelph

- Teach weekly lab sections for **15+ students per section**; facilitate problem-solving on sets, relations, proofs (induction), counting, and logic.
- Hold office hours **2–3 hrs/week**; support online Q&A (Piazza/Ed); provide rubric-based feedback on assignments/quizzes for **15+ learners/section**.

Research Assistant

May 2025 – Aug 2025

University of Guelph Research, Guelph, Ontario, Canada

- Investigated HCI in collaborative learning with AI; contributed to study design, qualitative analysis, and reporting.
- Co-authored 1 manuscript** under submission to CHI (see below); collaborated with a multidisciplinary team; mentored peers across HCI topics.

Software Developer

Feb 2024 – Apr 2024

Engineering Ambition, Guelph, Ontario, Canada (8-week client engagement)

- Delivered full-stack features for a prep platform used by **hundreds of students** (MCAT/LSAT).
- Built scalable Next.js/React front ends with Tailwind; focused on responsiveness and DX.

PUBLICATIONS & MANUSCRIPTS

Social and Playful Appropriation of a Smartwatch Stress Monitor

Under submission to CHI '26

S. Eswarathas, Dr. Zhao, et al.

- Investigates social and playful uses of smartwatch stress avatars beyond accuracy-centric tracking; **co-author** (methods, analysis, manuscript writing).

PROJECTS

Skin-Sync: AI Skincare Tracking and Advice 🦋

• Dermie: AI-Powered Chatbot

- Built a friendly chatbot with Google Gemini, grounded in dermatology sources, for personalized routines (**intent-based Q&A + routine generation**).
- Skills: AI, Google Gemini API, Flask, React.

PomoPanda — iOS Pomodoro focus app

in development

- Swift/SwiftUI**, MVVM, Combine; background-safe timers, local notifications, Live Activities, widgets; default **25/5** cycles with custom durations.
- Session history with **Core Data** (daily/weekly counts); focus on accessibility (VoiceOver) and privacy (no tracking).
